<b>v</b> .	Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement							
1.	Statement							
	Novelty (N)	Claims	1-14	YES				
		Claims		NO NO				
	Inventive step (IS)	Claims	1-14	YES				
		Claims		NO NO				
	Industrial applicability (IA)	Claims	1-14	YES				
		Claims		NO				

2. Citations and explanations

DE 31 06 110 A describes a device that coats a door with layer of quenching fluid in order to improve the resistance of the door to fire.

GB-A-2 191 091 describes a ladder-shaped tube that can be unrolled. An extinguishing agent is sprayed into the air through jets in order to wash gases from the air.

DE 199 60 165 A describes a flexible hose with jets that functions in a similar manner.

WO 00/59579 A describes a suction device for producing a vacuum having jets arranged in a tube.

None of these documents discloses a device or a process for producing a liquid wall, wherein jets are arranged in a channel at a vertical distance from the mouth thereof.

Moreover, the operating principle of the devices known from GB-A-2 191 091 and DE 199 60 165 A consists rather in mixing the fluid with the gas than of producing an air-gas flow oriented vertically relative to the ground that carries away gas flowing close to the ground.
